

## 209 EIP PU

a two component solvent free toughened polyurethane coating designed for high impact operating environments. The product when applied at 2-3mm gives a flexible but hard wearing finish to metallic surfaces to protect against impact from aggregates and slurries.

*Chemical powder process vessel and chute were lined with 3mm of 209 EIP PU.*

The product can be used to rebuild damaged or worn surfaces on equipment such as -

- **Hoppers and chutes**
  - Pipe spools
  - Grinders
- **Mixers and mixer blades**
- **Conveyor guides and sides**
  - Back plates

*Aggregate sieve abrasive blast cleaned and relined with 3 coats of 209 EIP PU*
